#### **WE ARE**

### **CLIMATE FORESTRY**

Forest Management Optimisation
Certification, Legality Assurance
Financial Strategy, Capital Raising
International Conventions

### Who We Are

Climate Forestry is a specialist professional forestry company with programmes of work to optimise operational forest management, support forest certification and timber legality assurance, develop and implement sustainable financial strategies, and support organisations to meet the requirements of International Conventions and Environmental Agreements.

#### **Programmes**

Forest management strategy and optimisation

Drafting and revising forest management plans

Third-party monitoring and compliance assessments

Forest certification, timber legality assurance

Financial restructuring strategy and capital raising

Project and policy support to meet International

Conventions and Environmental Agreements

## Forest Management Optimisation

Developing strategic, economic and management plans to assure long-term responsible forest stewardship.

We understand spatial and temporal forest dynamics and incorporate historical / current influences to define operational constraints and opportunities for improved management.

Incorporating economic, environmental and social safeguards, including best-practice for integrated landscape planning.

# Forest Certification Timber Legality Assurance

Strategic planning and development for the implementation of forest certification and verified-legal frameworks.

Advisory to support operations meet national and international forest certification standards of compliance.

We assure compliance through strategic advisory and operational monitoring of activities and programmes.

# Financial Strategy Capital Raising

Predictable, reliable and sustainable finance requires uppermanagement commitment, operational efficiency and quality assurance monitoring.

We support the creation of innovative financial mechanisms tailored to the needs of our clients.

Exchange traded Funds registered in jurisdictions with strong regulatory frameworks, due diligence and transparency.

## International Conventions Environmental Agreements

Maintaining competitiveness in the industry requires organisations to follow and understand the status of instruments affecting their operations.

We provide up-to-date information, analysis and strategies to safeguard the interest of our clients while assuring operations meet the requirements of International Conventions and Environmental Agreements.
